

Malls Retail stores

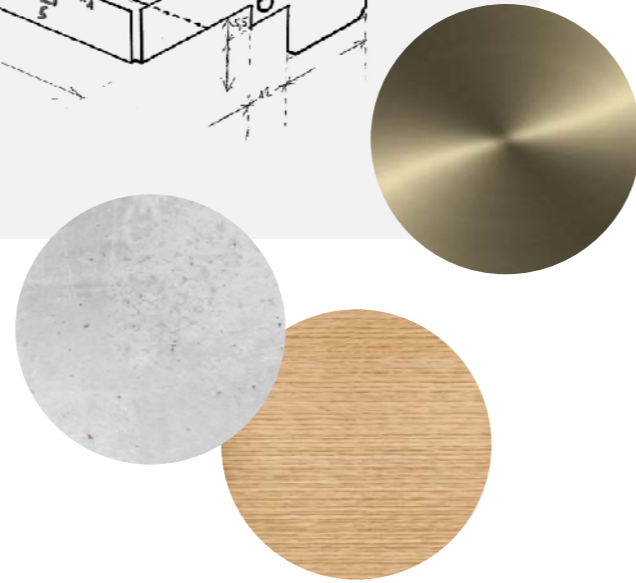

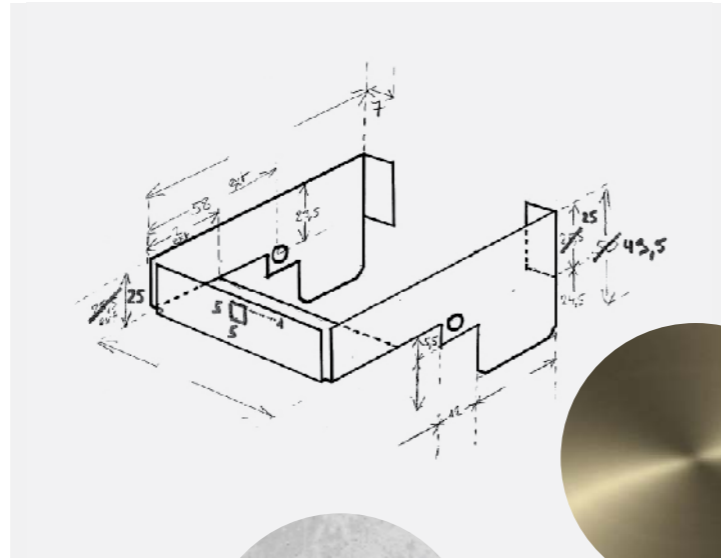

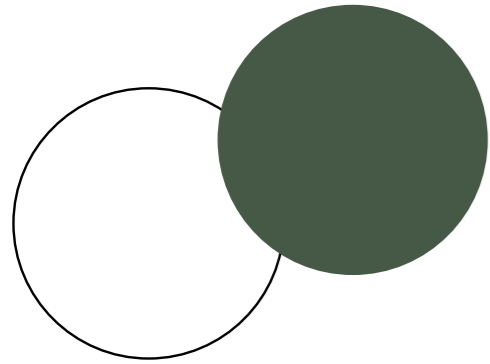

Béhar supports all stakeholders involved in the design, operation, and fit-out of retail spaces — from independent boutiques to large shopping centers.

Our expertise, combining technical mastery and innovation, allows us to deliver bespoke solutions for the discreet and elegant integration of emergency lighting, perfectly aligned with the interior architecture and customer experience.

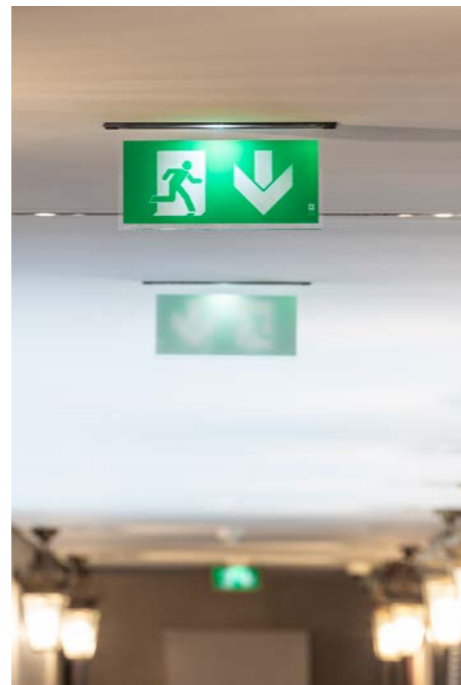

Design for all architectures

Since 1960, Béhar has been designing emergency lighting fixtures with clean lines, made from sustainable materials.

They blend naturally into any architectural environment.

Every detail can be customized: shape, color, finish, mounting type, accessories, surface treatment, etc., to meet the aesthetic requirements of each project.

Customization

Infinite customization — each product can be tailored to the needs of your project and the specific characteristics of the building.

Our emergency lighting solutions

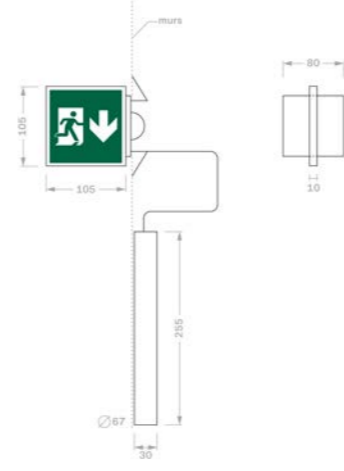

All our solutions are available in addressable, self-test, power central source, and self-test bi-function versions. Custom solutions and special finishes available on request.

A non-exhaustive selection of our solutions — find our full range on our website:
