

# Offices

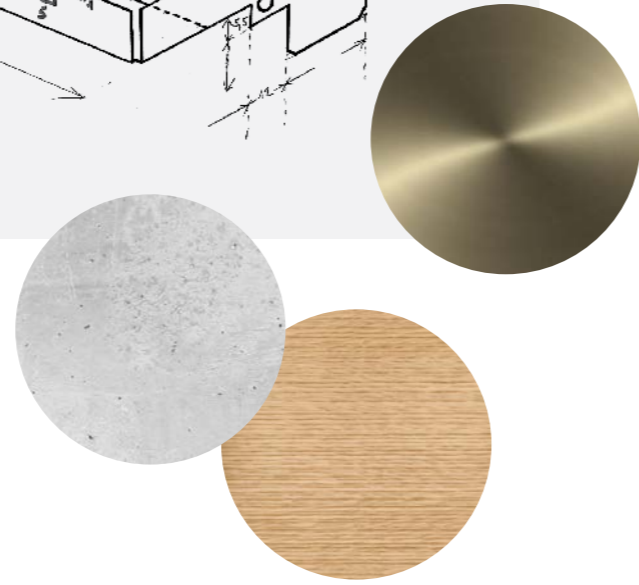

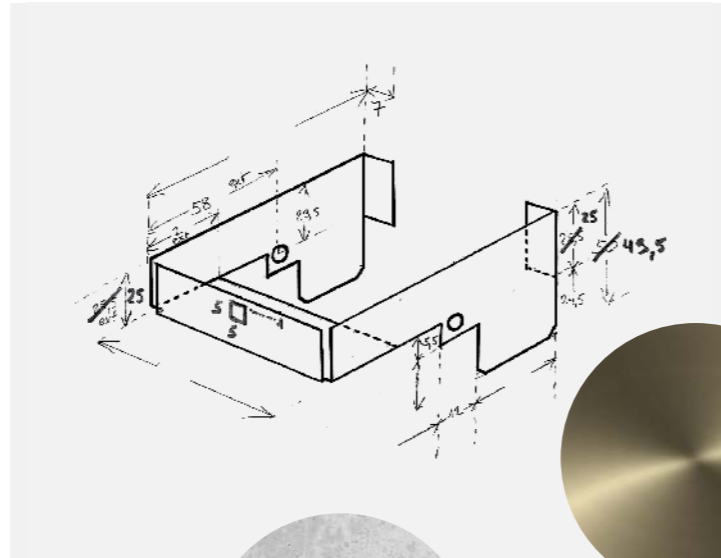

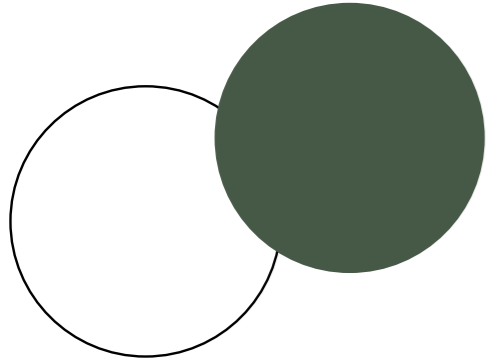

**Béhar supports the various stakeholders involved in the design, operation, and maintenance of workspaces — from small independent offices to large corporate complexes.**

**Our expertise, combining technical mastery and innovation, enables us to deliver tailor-made solutions for the optimal and aesthetic integration of emergency lighting, in perfect harmony with the architecture.**

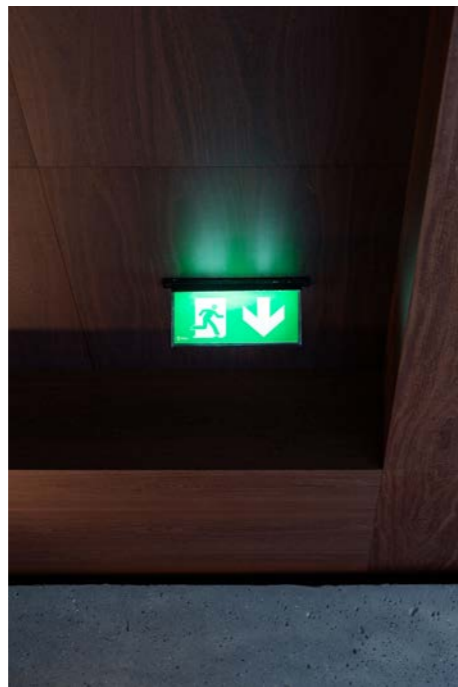

# Design for all architectures

Since 1960, Béhar has been designing emergency lighting fixtures with clean lines, made from sustainable materials.

They blend naturally into any architectural environment.

Every detail can be customized: shape, color, finish, mounting type, accessories, surface treatment, etc., to meet the aesthetic requirements of each project.

# Customization

Infinite customization — each product can be tailored to the needs of your project and the specific characteristics of the building.

# Our emergency lighting solutions

All our solutions are available in addressable, self-test, power central source, and self-test bi-function versions. Custom solutions and special finishes available on request.

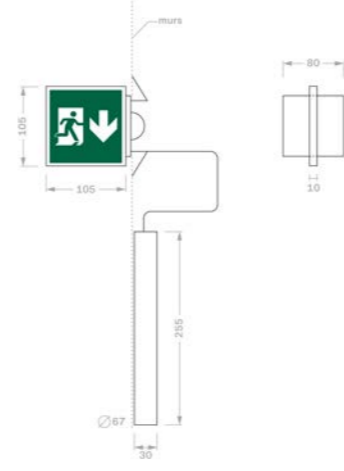

A non-exhaustive selection of our solutions — find our full range on our website:
