

# Architectural emergency lighting

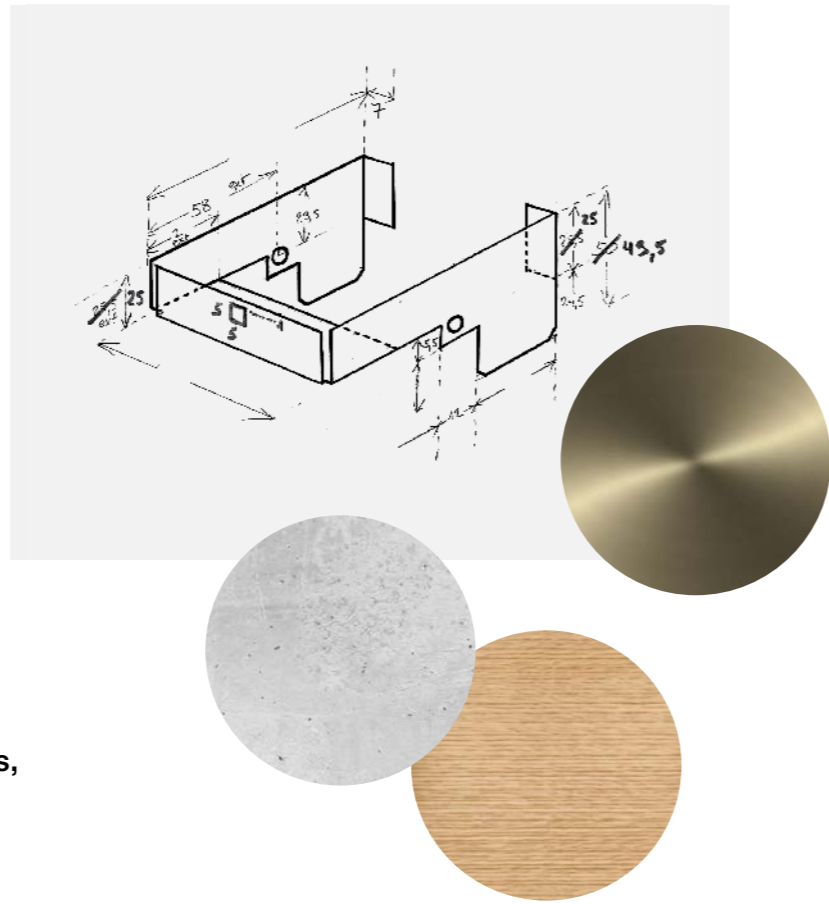

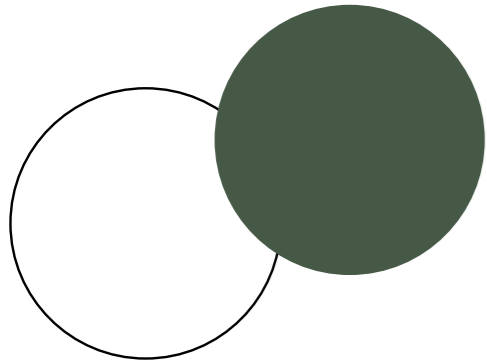

Béhar designs and manufactures high-end emergency lighting that integrates seamlessly into every architectural project

Our expertise, combining technical know-how and innovation, enables us to offer customised solutions for the aesthetic integration of emergency lighting across all architectural environments.

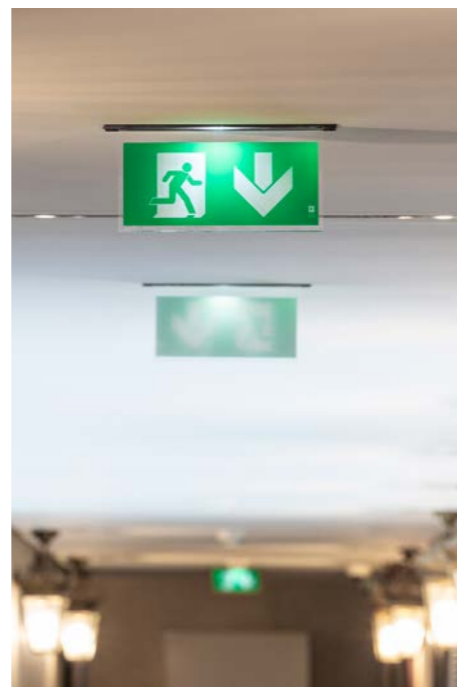

Designed and manufactured in France, our luminaires combine design, reliability, and durability. Their repairable and upgradeable design extends their life cycle while complying with building standards and aesthetic requirements.

# Design for all architectures

Since 1960, Béhar has been designing emergency lighting fixtures with clean lines, made from sustainable materials. They blend naturally into any architectural environment.

Every detail can be customized: shape, color, finish, mounting type, accessories, surface treatment, etc., to meet the aesthetic requirements of each project.

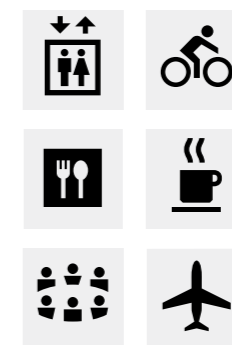

# Customization

Endless customization — each product can be tailored to the needs of your project and the specific characteristics of the building.

Creation and customization of pictograms to ensure consistent wayfinding throughout the entire building.

# Our emergency lighting solutions

All our solutions are available in addressable, self-test, power central source, and self-test bi-function versions. Custom solutions and special finishes available on request.

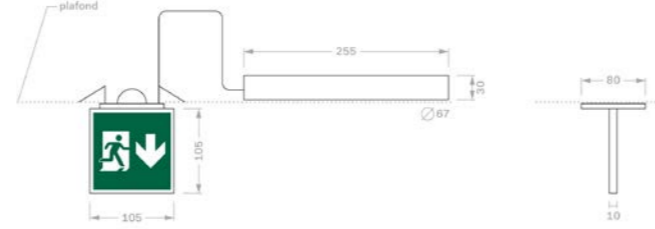

A non-exhaustive selection of our solutions — find our full range on our website :

## Architecture

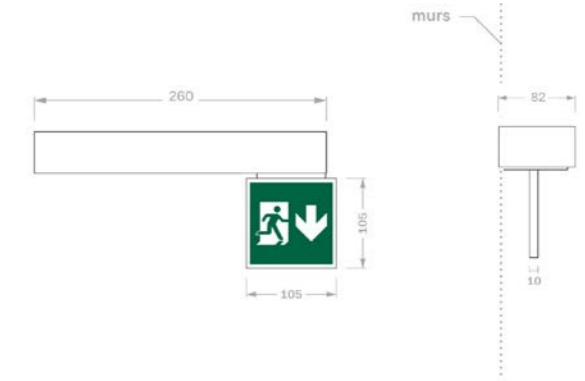

### Luce

The most compact recessed model on the safety lighting market.

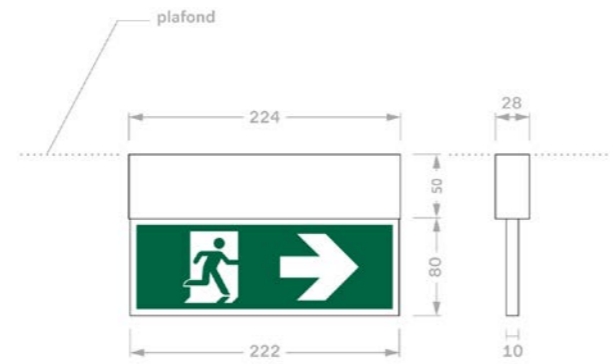

### Luce

Available in horizontal or vertical wall surface.

### Spark

Available in 7 mounting types and different sizes.

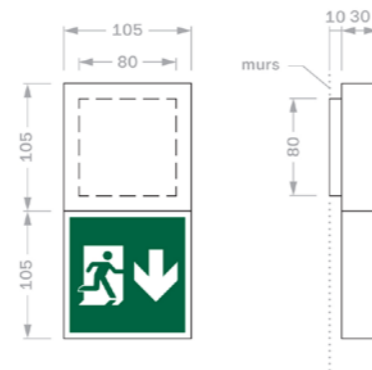

### Clas

Rounded corners, available in wall surface.

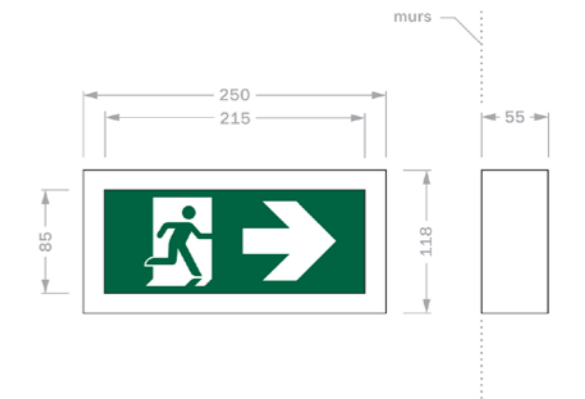

### Lou

Available as a wall-mounted or recessed model.

### Knopé

Solid oak wood, available in wall surface.

# Our emergency lighting solutions

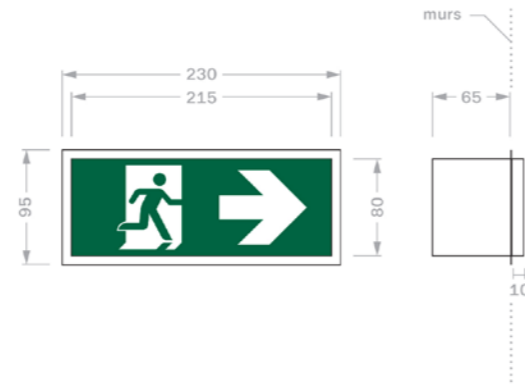

All our solutions are available in addressable, self-test, power central source, and self-test bi-function versions. Custom solutions and special finishes available on request.

## Architecture

### Star

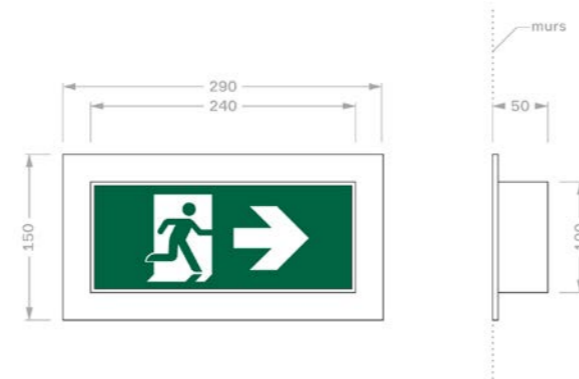

Available in wall surface or recessed wall.

### Skape

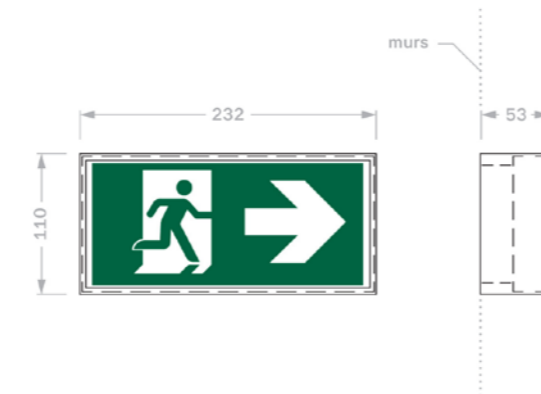

Aluminum model available in surface or recessed.

### Eclat

Steel trim, available in wall surface.

# Our anti-panic lighting solutions

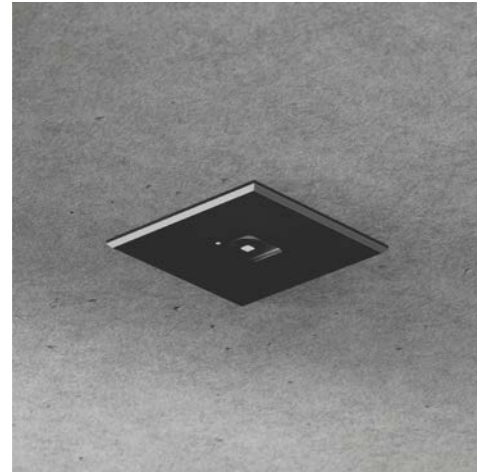

All our solutions are available in addressable, self-test, power central source, and self-test bi-function versions.  
Custom solutions and special finishes available on request.

A non-exhaustive selection of our solutions — find our full range on our website :

## Architecture

### Luce

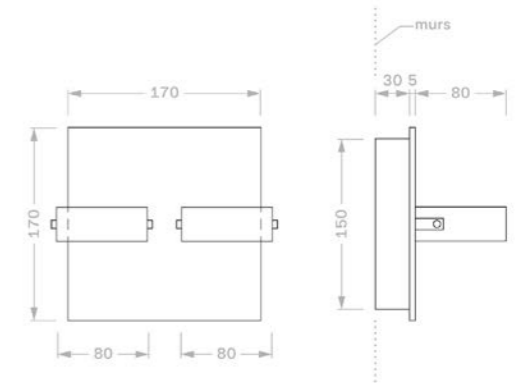

Available in square or round recessed ceiling.

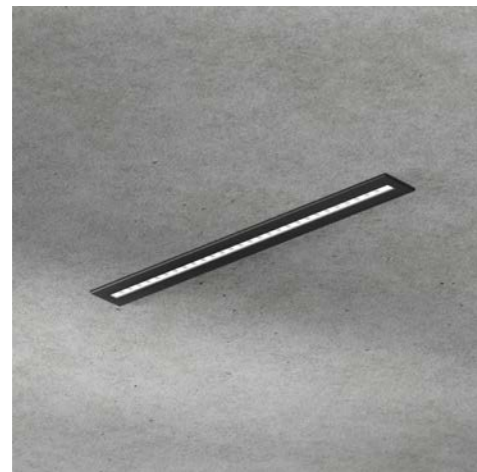

### Luce

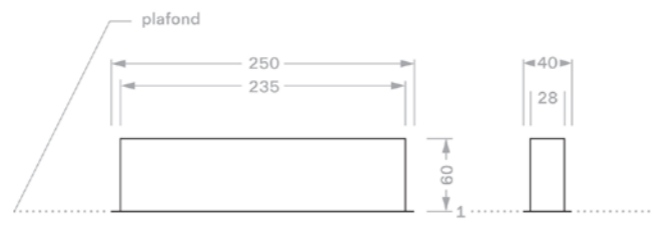

Surface-mounted model, high luminous flux.

### Spark

Available in 7 different installation types and sizes.

### Clas

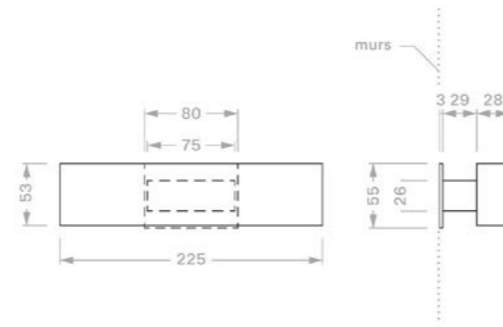

Rounded corners, available in ceiling surface.

### Spark

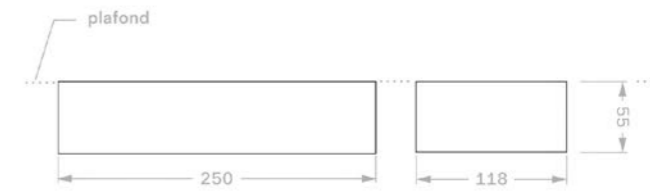

Available in 7 different installation types and sizes.

### Knopé

Solid oak wood, available in ceiling surface.

# Our specific sign lighting solutions

Customizable solutions and special finishes available upon request.

A non-exhaustive selection of our solutions — find our full range on our website :

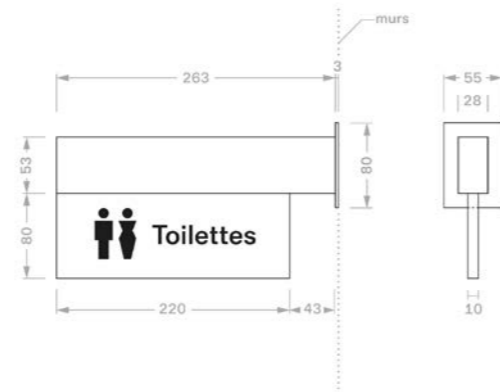

## Architecture

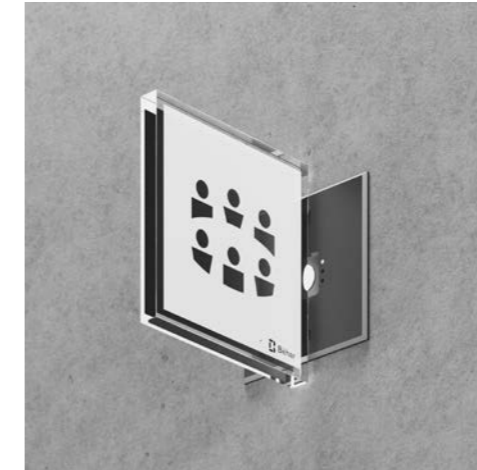

### Spark

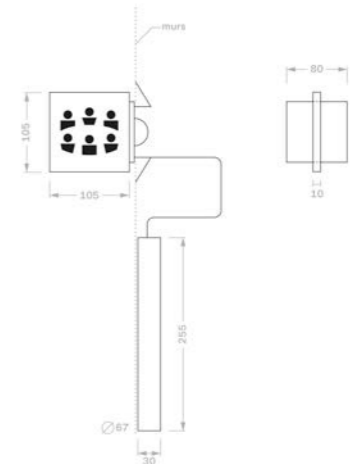

Available in 7 different installation types and sizes.

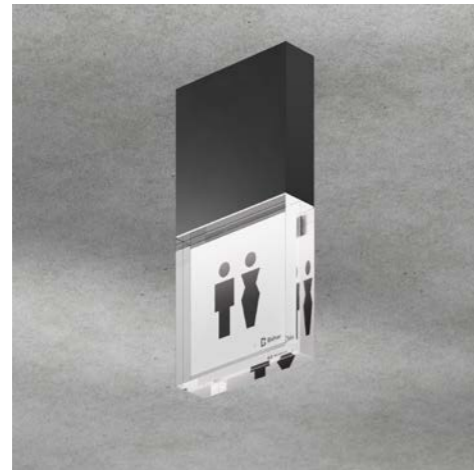

### Luce

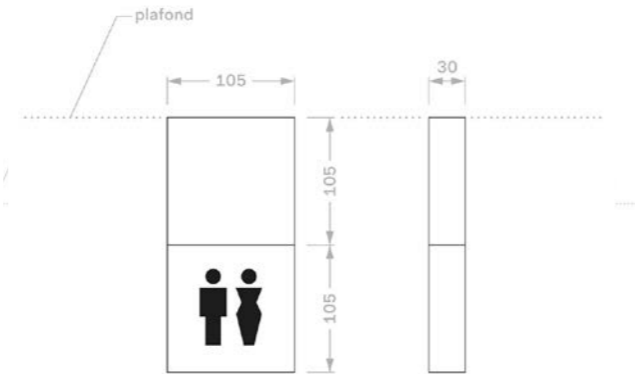

Available in round or square, recessed wall or ceiling.

### Lou

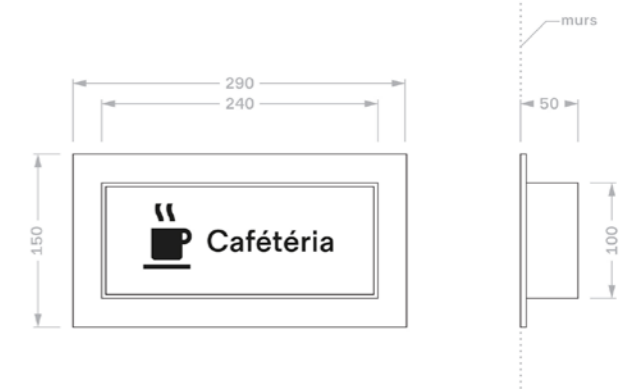

Available in wall or ceiling surface and recessed.

### Skape

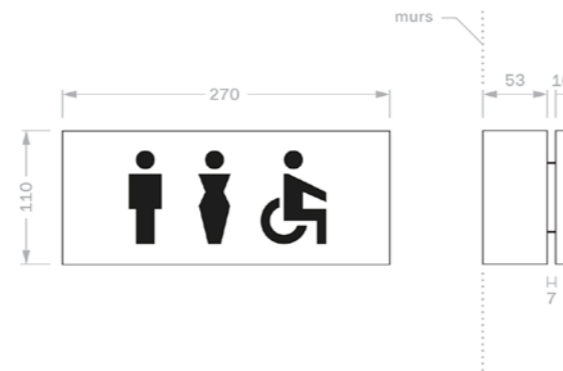

Aluminum model available in surface or recessed.

### Star

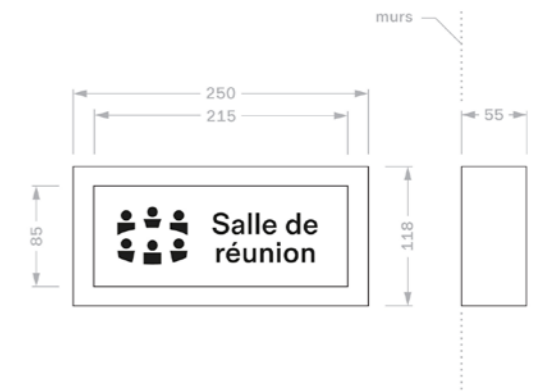

Available in wall surface or recessed.

### Knopé

Solid oak wood, available in wall surface.

# Our emergency lighting solutions

All our solutions are available in addressable, self-test, power central source, and self-test bi-function versions.  
Custom solutions and special finishes available on request.

## Technical

### Vista Cinéma

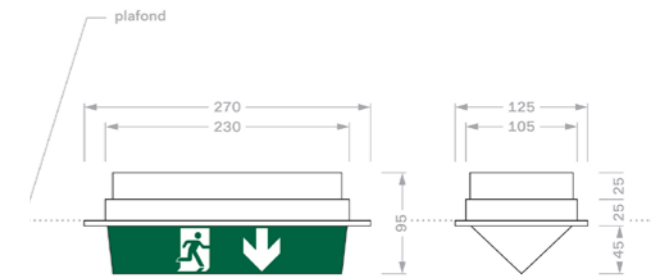

Developed in collaboration with the National Federation of French Cinemas.

### Compact Triangulaire

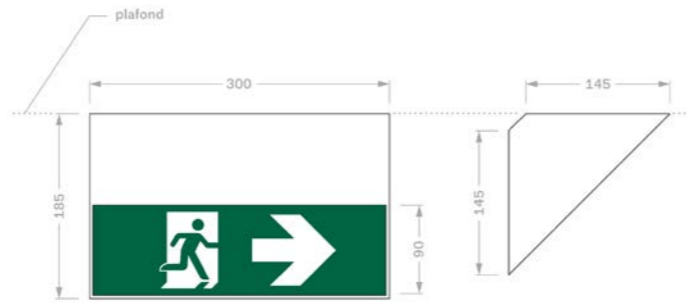

Available in surface or recessed.

### Vista Opéra

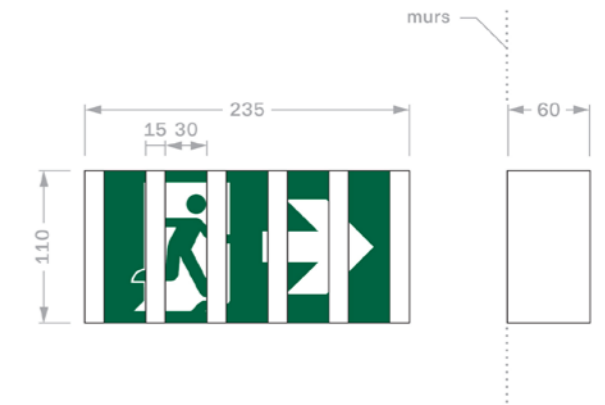

Suitable for high-ceilinged auditoriums.

### Eclat<sup>2</sup> Grid

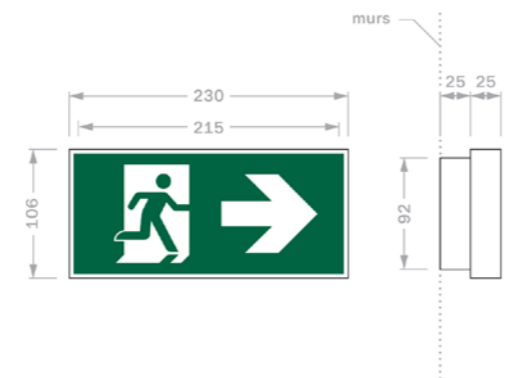

Protective grid available in surface or recessed.

### Eclat<sup>2</sup>

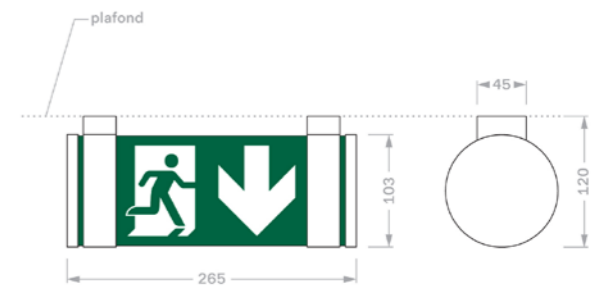

Available in surface or recessed.

### Cylindrik

Stainless steel model, available in wall or ceiling surface, or suspended.

# Our anti-panic lighting solutions

All our solutions are available in addressable, self-test, power central source, and self-test bi-function versions.  
Custom solutions and special finishes available on request.

A non-exhaustive selection of our solutions — find our full range on our website :

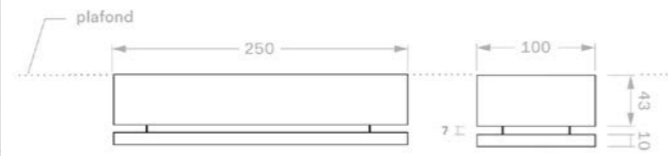

## Technical

### Star

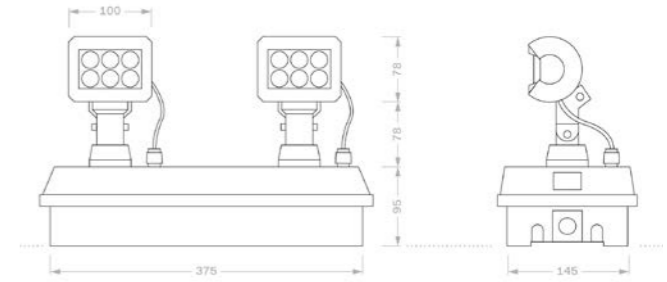

Optics suitable for dark rooms, available in ceiling surface.

### Phare

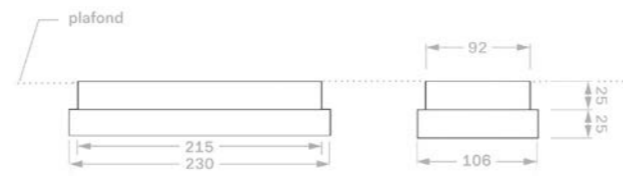

Optimization of ambient lighting thanks to high luminous flux.

### Eclat<sup>2</sup>

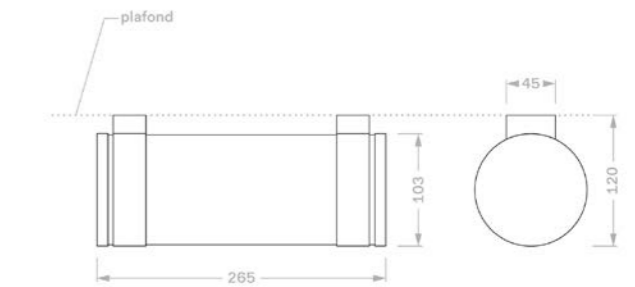

Available in ceiling surface or recessed.

### Cylindrik

Stainless steel model, available in wall or ceiling surface, or suspended.

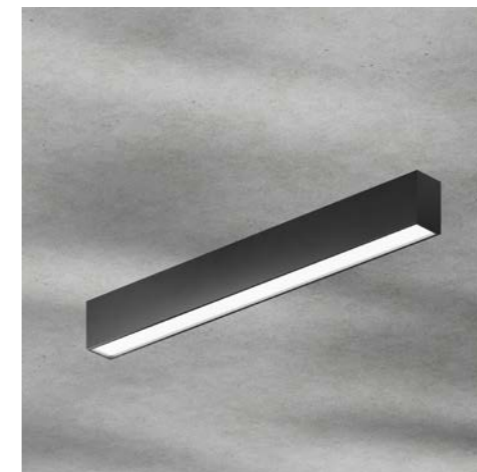

### Cylindrik

Available in ceiling surface or suspended.

### Réglette

Available in ceiling surface or suspended.

# DiCube Smart System

Connected safety,  
simplified maintenance,  
and regulatory compliance.

## Smart and Connected Architecture

The system is built around a Hub module capable of controlling up to 10 consoles, connected via RS-485 (Modbus) or RJ45 (Ethernet). The consoles manage the supervision of lighting units using the DALI protocol. Thanks to its compatibility with a BMS such as EcoStruxure™ (Schneider Electric system, parent company of Béhar Sécurité), the DiCube Smart System integrates seamlessly into building management systems, providing centralized and optimized supervision.

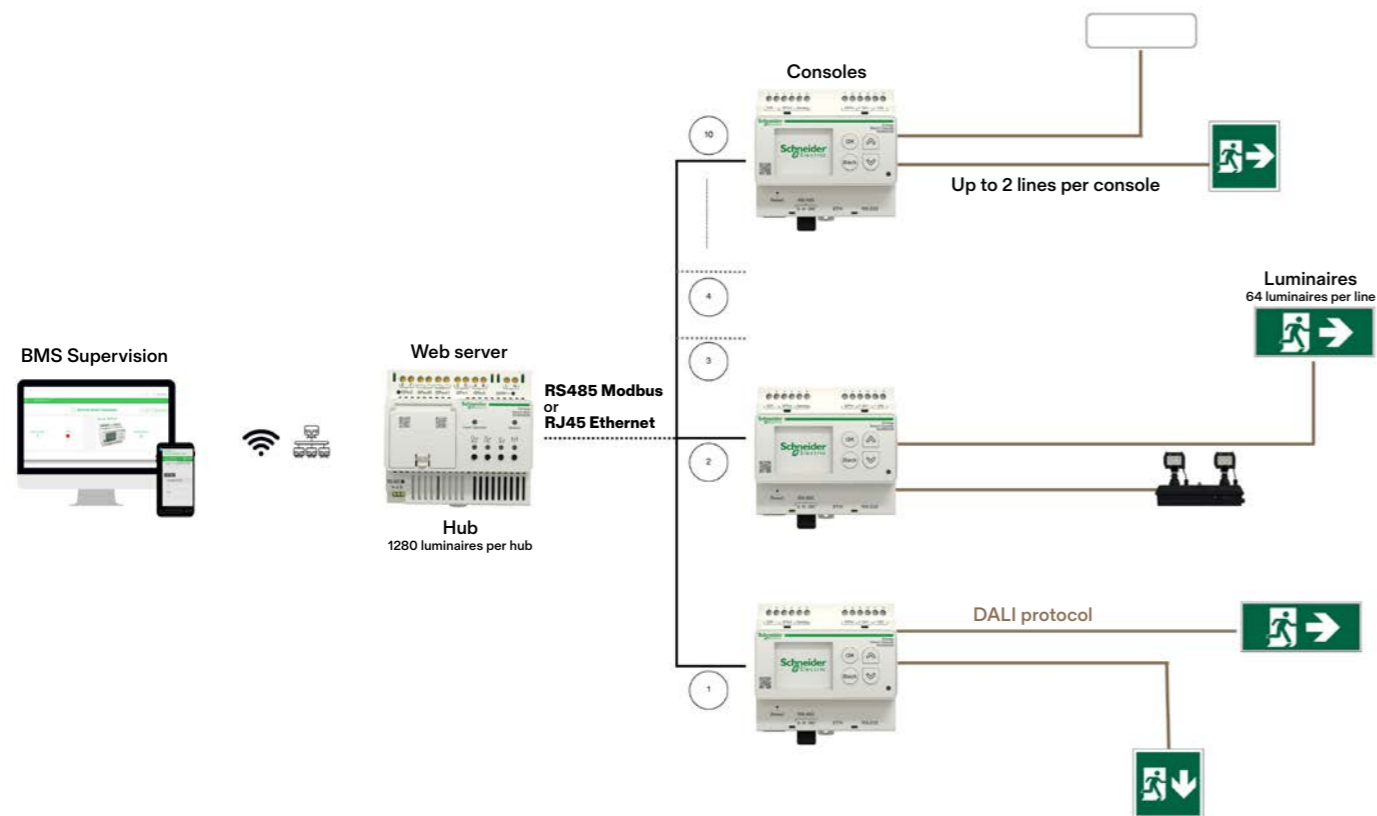

## Simplified Supervision and Maintenance

The system automatically monitors up to 1,280 luminaires, detects anomalies, and reduces on-site interventions, in compliance with EN 62034.

## Regulatory Compliance

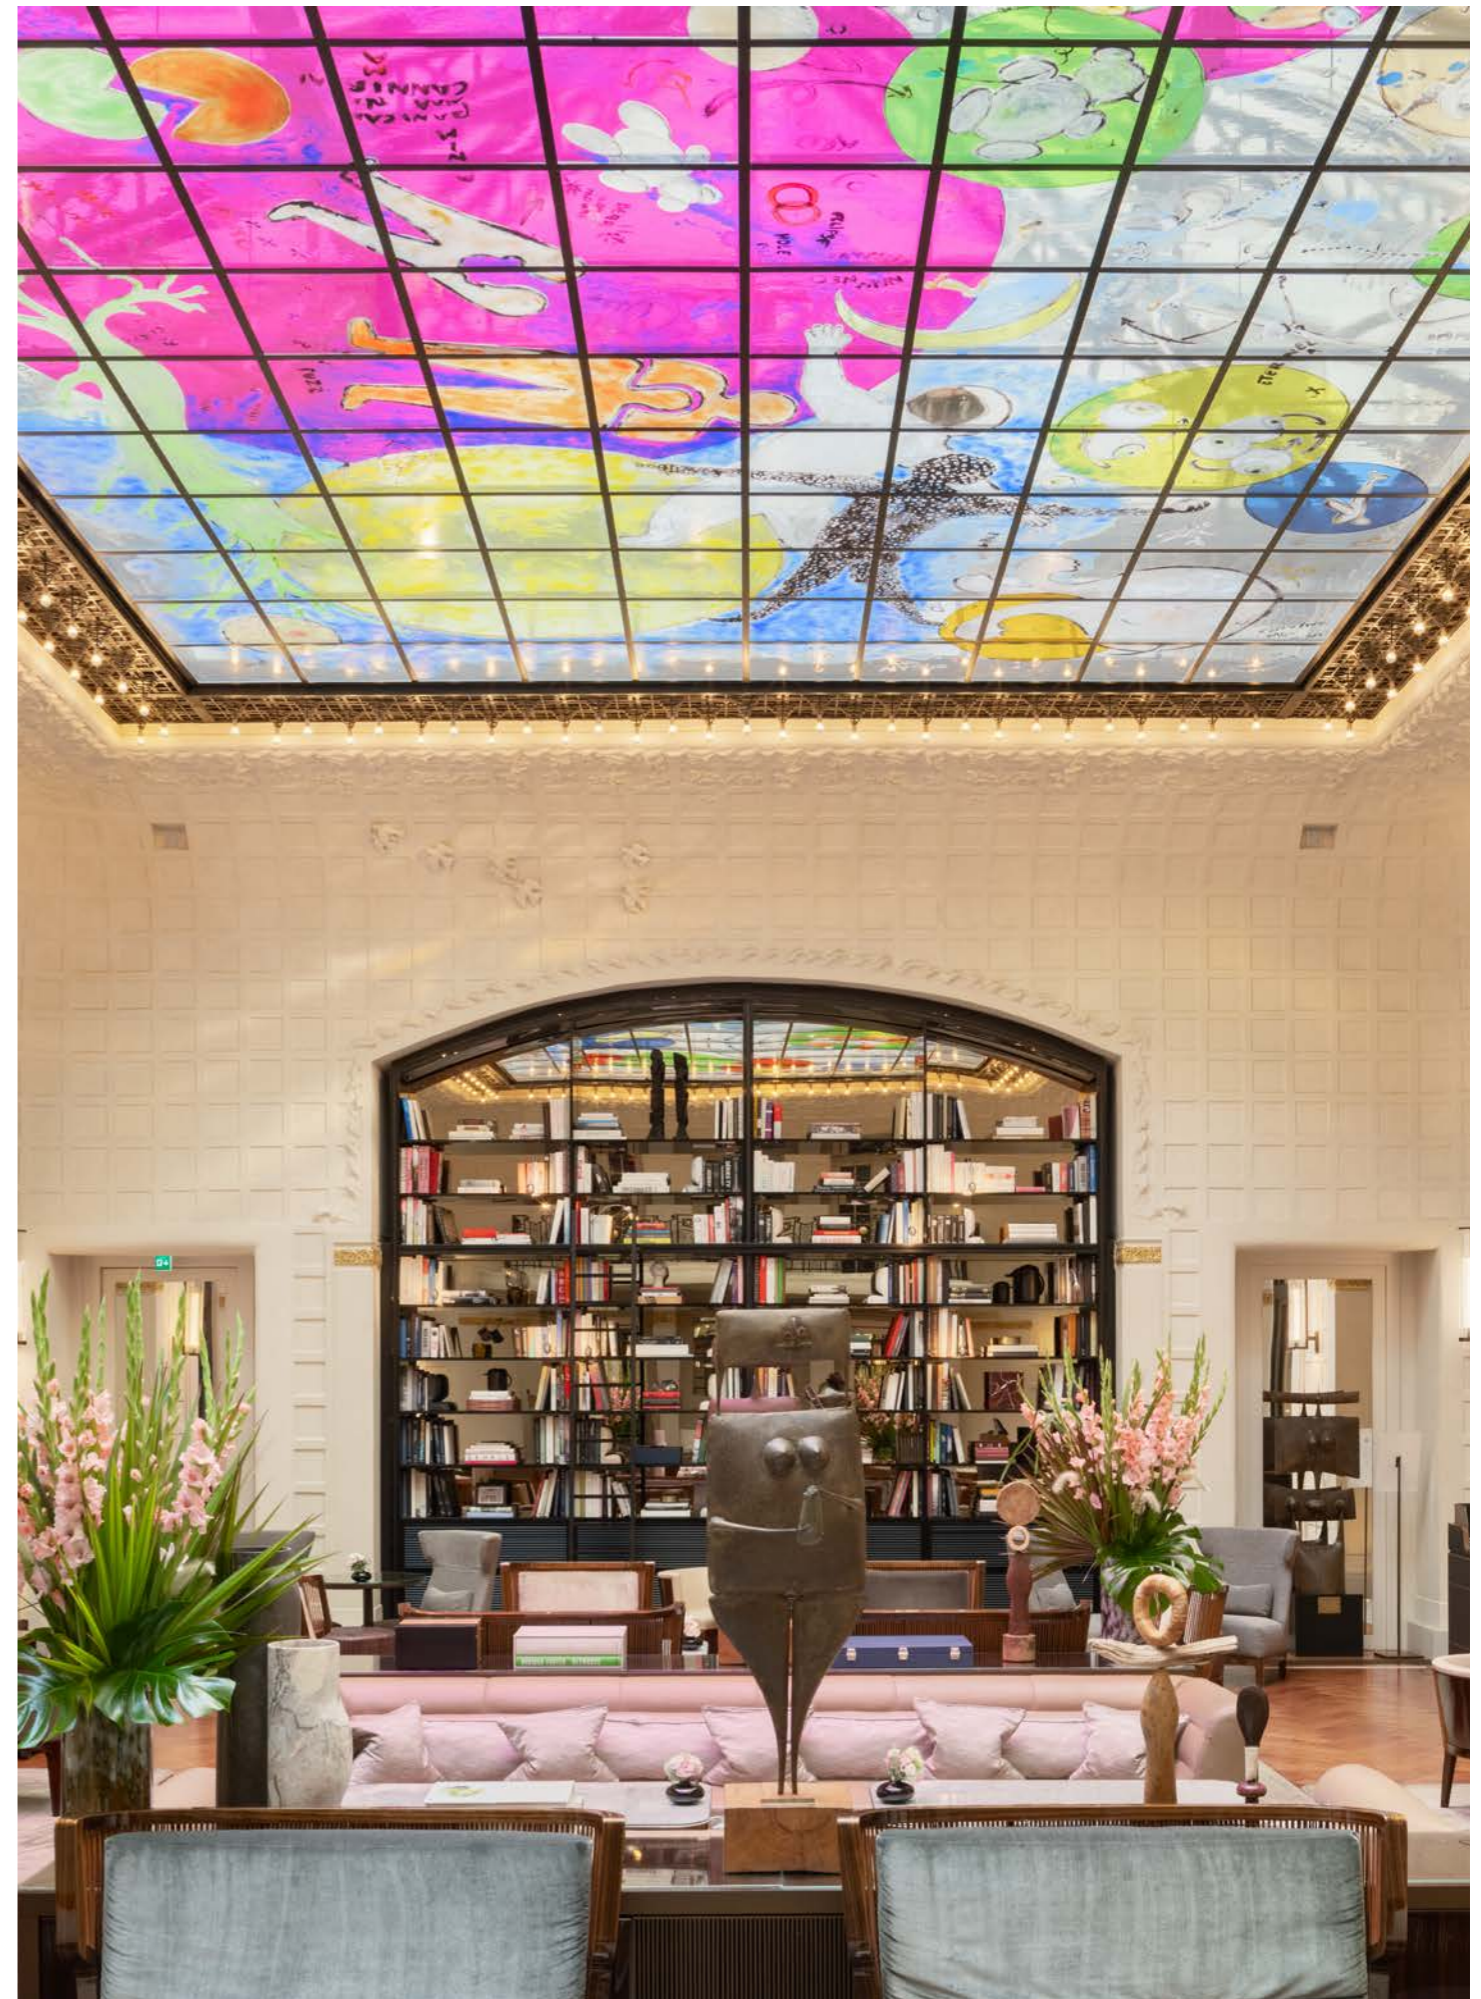

The system ensures compliance with the maintenance standards for emergency lighting (BAES and BAEH, NF C71-830), which require operators to perform monthly, semi-annual, and annual checks of emergency lighting while maintaining a security log.

A connected emergency lighting solution,  
monitored in real time.
